CS50 Week 2 Lab

Gabe LeBlanc | 9/14/22

Welcome to CS50 Lab!

1. Name & pronouns (if comfortable)
2. Year
3. Dorm/House/School
4. What you're thinking of studying
5. Why you're taking CS50

github.com/gblanc25/cs50

Tutorials: Fridays at 2pm in Cabot dhall

Office Hours: Sundays 3-5pm in Widener

Structure of Lab

1. Quick pset review
2. Walk through CS50–assigned lab exercise
**in small groups, then as a class*
3. Q & A about lab assignment
4. (Time permitting) Additional practice exercises
**always posted on my website!*

IMPORTANT NOTES ABOUT GRADING

Grades are normalized across TFs. If I'm a harsher or lighter grader, the course will take that into account when assigning final grades, so don't worry when pset grades come out!

Scores of '5' on design are **rare**. Your benchmark for success in this course is a '3', and '4' is a great place to be.

Notes From Pset 1

variable naming

```
return (cents / 25)
```

Lab 2: Scrabble

Storing values in an array

Indexing into an array

Function notation

ASCII values
